# Advertiser's Profiles

ALCO-Safe (Pty) Ltd is the major supplier of quality electronic Breath Alcohol Detectors and accessories in South Africa with 43 years of experience in manufacturing, distribution and support.

The company has over three thousand clients to which tens of thousands of Lion Alcolmeters® have been supplied.

ALCO-Safe (Pty) Ltd also supplies drug detection equipment utilising individual urine and saliva test kits as well as electronic instrumentation which provides an analysis and printout of the presence of up to six different types of drugs within minutes.

## Superior equipment supplied

Only professional grade instrumentation is distributed and knowledge of state-of-the-art technology and of effective measurement techniques is maintained through regular communication with world leaders in these areas.

ALCO-Safe represents LION - CMI - the a world leader in Alcohol Detection Technology.

## Instruments for all situations

Instruments supplied include high speed testers capable of testing up to six people per minute at site entrance or exit points for example, as well as portable instruments for use at remote sites, which provide immediate printed evidence.

## Full repair and calibration capability

A complete, rapid repair and calibration service is provided.

Training and certification of personnel in the correct operation and calibration of instruments is regularly undertaken.

## Awareness presentations/operator training

Internal awareness programmes are offered to management and workforce representatives, highlighting alcohol's many negative effects in the workplace.

This effectively addresses issues such as contribution to accidents, injuries, productivity, absenteeism and many other loss areas; testing techniques; legal aspects; bodily alcohol concentration with elapsed time versus consumption; many myths; health problems and other matters.

## Large and diversified client base

ALCO-Safe has, over many years, assisted a large number of organisations large and small. This has ranged from the supply of equipment only, to the development of substance abuse programmes and their implementation on a national basis.

ALCO-Safe (Pty) Ltd initiated the development of comprehensive substance abuse programmes in South Africa in the early 1990s.

Organisations that have benefitted from the solutions - to name a few - include Transnet, Eskom mining groups, Prasa, Transnet Rail Engineering, Transnet Freight Rail, all the petroleum refineries, ArcelorMittal, Tongaat-Hulett, Sappi, major vehicle manufacturers and municipalities.

To remain competitive and focussed on your core business, restructuring, downsizing and similar strategies have often necessitated businesses reducing the attention paid to and the priority required for the maintenance of good corporate governance and best practice.

In this process, the onerous financial, legal and moral liabilities of Occupational Safety, Health, Environmental (SHE) and General Risk Management, which can impact on the competitiveness and reputation of a business, tend to be overlooked as the production and profitability imperatives receive priority. Businesses frequently lack the in-house expertise to meet these business liabilities.

Benrisk Consulting is your outsourced partner of choice to cost effectively manage the liabilities from the Occupational Safety, Health & Environment (SHE) Risks, Construction OHS Agent and Risk Management fields.

We provide a "3P" Service; a Personalised, Practical and Professional service, to facilitate a positive impact on the profitability of your operations.

Benrisk Consulting provides, amongst others, the following Outsourced Services:

## Occupational Safety, Health & Environmental Services:

- Construction H&S Specifications & Plans development (Pr.CHSA)
- Construction Site SHE inspections and audits
- SHE programme design and implementation services
- SHE risk assessments (baseline and issue-based)
- SHE management and advice services
- SHE inspection and legal compliance audit services (HETs)
- Incident investigation services (basic to comprehensive)
- Emergency procedures and recovery plan development

## Risk Management Services:

- Risk management process implementation services

- Risk assessments (basic/ HAZOP/ What-it/ FMECA/ FTA)
- Enterprise-wide baseline risk assessments
- Risk control survey and audit services
- Management risk profiling and assessment workshops

#### **Insurance Underwriting Survey Services:**

- Site insurance underwriting survey reports
- Insurance underwriting loss estimates (EML reports)

#### **Training Courses:**

- SHE courses:
  - "Hard & Soft Rock" Excavation Safety training
  - Risk assessment (Baseline & Issue-based HIRA)
  - OHSAct 16(2), H&S Representatives, etc
  - Comprehensive incident investigation
  - General maintenance safety induction
  - SHE topic presentations as requested
- Risk Management courses:
  - Risk Management (SANS/ISO 31000 & Board oversight)
  - "PEPMELF" Baseline Risk Assessment & Risk Profiling
  - Conference & seminar presenter

Founded in 2005, DOT Safety Footwear is one of southern Africa's leading manufacturers, stockists and wholesalers of safety footwear. Supplying a comprehensive range of quality footwear at competitive prices, we continuously live up to our pledge of Consistency, Durability and Reliability.

Each brand, range and style within our group has been specifically designed and engineered to fit the unique challenges and requirements of your particular industry.

Our range includes steel toe cap safety boots and shoes, security footwear and PVC gum boots which are manufactured in our local factory in Johannesburg, South Africa.

DOT supplies the market via a network of resellers and distributors across Southern Africa.

With an excess of over 200,000 pairs of boots and shoes in stock in our Johannesburg warehouse, DOT Safety Footwear is the largest stockist and wholesaler of safety boots and shoes in Southern Africa.

Consistency in supply and the availability of our products are essential components to our ongoing success.

All the safety footwear in the DOT Range are CE EN ISO 20345 Approved.

Furthermore, DOT is NRCS compliant as per mandatory local legislation. At DOT we pride ourselves on our core values of integrity, accountability, humility, collaboration and service excellence. We have a passion for safety and are a non-racial, non-discriminatory organisation providing real and tangible value to all our stakeholders.

For over 200 years, DuPont has established a global reputation for excellence in safety management. Those who dedicate their lives to protecting ours deserve the best protection available. As a leader in innovation in safety and personal protection, we continue to collaborate with firefighters, first responders and garment manufacturers to solve complex problems that help improve overall safety.

In addition to this, DuPont has developed an extensive line of products and services. These include a wide range of proven, science-based solutions including some of the most trusted brands in the industry.

In the emergency response segment, DuPont is a global leader in the supply of Nomex® heat and flame protection for fire fighters, petrochemical and utility workers.

Sometimes, the biggest threats to worker safety are the ones you can't see. That's why DuPont develops innovative chemical protective clothing that helps protect wearers from dangerous vapours, liquids and particles. DuPont produces and supplies a full range of chemical protective clothing, namely the Tyvek® and Tychem® portfolio, encompassing EN approved, Type 6, 5, 4, 3, 2 and 1.

The Fire Protection Association of Southern Africa (FPASA) was established in 1973 to provide a specialized fire safety management, technical and training service to industry, commerce and society at large.

Over the years the Association has developed a range of membership options and technical, training and fire safety management services that are recognised for their quality, professionalism and value.

Today the role of the FPASA covers education, information,

advice, consultancy and training (Fire College).

The Fire College is a professional training centre dedicated to assist in the reduction of life and property losses in the Southern African region. It provides training on request of FPASA members and non-members alike, and in addition, provides original training programmes to suit the broad spectrum of industrial, commercial, institutional, local authority and insurer requirements.

The Technical Division includes the Library which offers a support service to the FPA Fire College and to FPASA members. The division offers specific insurer services and a range of fire safety management consulting services to members and clients.

The Administration and Services Division of the FPASA provides administration support to the Fire College and Technical Division. It also facilitates membership support and publication sales.

Our categories of membership and associated benefits will add value to any institution or business having an interest or involvement in fire engineering, fire protection, fire prevention or fire safety management.

The organisation enjoys extensive accreditation and approval including:

- LGSETA ETQA accreditation for the training courses
- ISO 9001: listing for the quality management system
- SABS 1475 accredited fire equipment workshop
- IFE (UK) academic recognition for the Fire Investigation Course
- SAQCC (Fire) accreditation for the fire Appliance Reconditioning course
- Botswana Qualifications Authority (BQA) accreditation and recognition

We also presently have a BEE Level 4 status.

*Premises and facilities*

The FPASA operates from purpose-built premises in BOKSBURG on a site of over two hectares consisting of;

- An administration block accommodating a fire safety library, museum/memorabilia display facilities and offices
- A fire college building with three lecture rooms, an auditorium, fire museum/ memorabilia display area
- A fire house area with a lecture area, technical workshops and indoor live fire facility
- A large outdoor fire facility with fixed installation demonstration rigs and a drill ground

#### MAKING A DIFFERENCE – CHANGING LIVES

H.A.S.S. Industrial was the first company in South Africa to manufacture custom-made hearing protection devices, in accordance with international compliance and standards.

They developed a hearing conservation management programme, which incorporates Noise-Ban™ custom-made hearing protection devices, to assist companies in reducing noise-induced hearing loss in the workplace.

H.A.S.S. Industrial is an ISO 9001:2015 certified company and believe in 'International Best Practice' in everything they do.

H.A.S.S. Industrial is part of the H.A.S.S. Group, a family-owned and-run business, established in 1975, focussing on complete hearing healthcare solutions.

Other companies within the H.A.S.S. Group, include:

**H.A.S.S. Southern Africa - Agents for Phonak hearing aids** (Switzerland) and Advanced Bionics cochlear implants in sub-Saharan Africa.

**The Ear Institute** – World class audiological services directly to the public and occupational market located in 20 centres across the country and two in Namibia.

**H.A.S.S. Medical** – Distributor of state of the art audiological and electromedical equipment to hearing healthcare providers and industry with back-up calibration and maintenance services.

**Eduplex School** – This is the passion outside the company. A mainstream private school started in 2002, the Eduplex is an international model for inclusive education, with a handful of deaf children per class. Here all children have the opportunity to learn on the same standard, in a normal environment, assisted by modern technology such as cochlear implants, hearing aids and FM communication systems. The school currently consist of a pre-, primary and high school, with a total of 780 learners.

What sets H.A.S.S Industrial apart from its competition?

H.A.S.S Industrial leverages successfully from the diverse capabilities, experience, and synergies within the H.A.S.S Group. Using the knowledge and expertise gained in the manufacturing of custom-made ear-tips for hearing aids, the company has diversified to include custom-made hearing protection and hearing loss prevention as a complete hearing healthcare provider.

# KARAM®

Member of  SAPEMA

KARAM manufactures an extensive range of personal protective equipment, with our most notable being for workers, working at heights.

We are the leaders in 'Fall Protection' safety equipment and manufacture over 900,000 harnesses annually.

KARAM has 30 offices worldwide and a global reach into over 100 countries. With the largest integrated manufacturing facility in the world, employing over 3,000 committed and dedicated individuals, we manufacture the components for our entire range of products.

KARAM is supported by the most technologically advanced machinery and processes. Our infrastructure facilitates the processing of yarns, manufacture of webbing and ropes, conversion of hot rolled coils and the conversion of steel and aluminium alloys into fall arrest components, all of which are supported by the finest intellectual and technological expertise in the world.

For 20 years KARAM has understood the needs of its customers. Manufacturing at KARAM is carried out under

strict quality supervision. KARAM has been awarded the ISO 9001:2015 Systems Certification by 5GS-UK, we are also certified to various international standards such as; CE (European) ISI; ANST (American) and AS NZ (Australia & New Zealand). We have been awarded more than 2,000 product certifications and have over 2,600 certified products produced in our state-of-the-art manufacturing plants.

Our Research & Development reputation has been built on a platform of innovation. It is KARAM's drive for perfection that has enabled the company to become a single-solution supplier by providing excellence, within all aspects of the safety equipment market and which has elevated it into one of the top global safety equipment manufacturing companies.

Our team of dedicated individuals, work continually towards a common purpose: World-class manufacturing; customer care and service; logistics and end-user training programmes.

KARAM is synonymous with 'quality' and we are committed towards the safety of millions of workers across Africa.

Knowing your needs better.

ccutech is a recognized national and international consultancy of occupational hygiene and environmental scientists undertaking all aspects of occupational and environmental management from auditing and assessment to the planning and management of remedial work or establishing management programmes.

For many years Occutech and its members have been an accepted authority on the anticipation, identification, evaluation and control of occupational hygiene, health and safety problems. With this basis, Occutech has been able to develop a reputation in designing and planning management programmes to enable improvement in environmental and occupational performance to occur.

Occutech is a permanent Approved Inspection Authority appointed by the Department of Employment and Labour (OH0012-CI 028) and SANAS (OH 0012) for the performance of occupational hygiene functions in industry.

Projects for both central and local government and the private sector companies have been undertaken. In a few instances, projects for individuals have also been performed.

- All aspects of occupational hygiene
- Risk assessment of production facilities and major hazardous installation
- Air, noise and water monitoring, assessment and control
- Management and monitoring of asbestos removal
- Designing of programmes to manage the risks
- Environmental Impact assessments
- Indoor air quality assessments
- Management of occupational, safety and environmental issues
- Community noise impact assessments
- Noise control
- Management of remedial works projects
- Recommendations for pollution abatement or avoidance and management

Occutech has a comprehensive occupational health, safety and environmental library and includes numerous computer aid programmes specifically designed for occupational hygiene and environmental issues. In addition to its permanent staff of specialists, Occutech has a portfolio of consultants who can be drawn upon when the need arises. These consultants are specialists in their field and where a multi-disciplinary approach or team is required, the team with the required knowledge and expertise can be formulated.

ProFit Safety Footwear was started in 2009. The founder and current owner saw a gap in the market for a serious supplier and distributor of well manufactured but affordably priced steel toe cap safety shoes and boots in South Africa.

He began supplying a core range of about 9 styles to suit specific industry needs. It quickly found homes with some of the most recognised construction, mining, agricultural and engineering firms in South Africa.

In 2016, the range rapidly accelerated to over 19 styles and a set of accessories including comfort innersoles and an industrial sock range.

Core focus having always been on high efficiency and stock availability, firmly cemented ProFit as a niche brand offering all the bells and whistles for the entire industrial and agricultural sector.

Our ISO 20345 compliant and NRCS approved product is now available from our Certified Partner distribution network in 6 countries in Southern Africa.

Our lean and mean, passionate team has almost 100 years' worth of combined experience in the safety industry.

Our objective is to offer you product knowledge and the perfect solution to all your safety footwear needs.

Reach out to us and find out what you can expect from the youngest, most dynamic and fastest growing safety footwear brand in the country.

Until you've experienced a few hours in a pair of ProFit safety boots or shoes – you've never really felt truly comfortable safety.

The 4 "Pillars of ProFit" are More TRUST. More EXCELLENCE. More VALUE. More EXCLUSIVITY.

# REBEL

## SAFETY GEAR

Member of  

REBEL Safety Gear is an independently owned manufacturer and wholesaler of personal protective equipment. We're proudly South African. Founded in 2004, REBEL revolutionised the safety footwear industry in South Africa with the introduction of the CHUKKA – A competitively priced traditional safety boot with quality, comfort and style to compliment an extensive range of built-in safety features.

Today the trusted REBEL range still features the iconic CHUKKA and more than forty traditional, premium, specialised and ladies' specific boots and shoes designed for maximum protection in the most extreme environments. REBEL boots and shoes incorporate the most innovative international safety features and technology that comply with local and international quality standards, whilst offering unrivalled quality, comfort and durability. REBEL footwear and protective gear is sold through our trusted network of distributors ensuring Africa's toughest boots and shoes are available to workers in a diverse range of industries throughout the continent.

Today's workforce demands far more from their protective footwear than ever before, expecting the latest in innovative safety technology, extreme comfort and distinctive style. For 15 years REBEL Safety Gear has pioneered the design and manufacture of high-quality innovative safety footwear for use in a diverse range of environments and unique applications for some of the toughest workers on Earth. Our products are manufactured from the finest materials, which have been rigorously tested for exceptional quality, comfort and durability. Our range of work boots and shoes are designed and manufactured to comply with local and international safety regulations and quality standards, conforming to both ISO 20345:2011 and SANS 20345:2014.

The Safety First Association was founded in 1932 by Sir Ernest Oppenheimer, and other leading industrialists who felt that there was a need to form a body to promote accident prevention in the workplace, on the road and at home.

The Association is an organisation not for gain whose main aims and objectives are to promote awareness of safety and health issues in industry as well as in all sectors of society.

This awareness is created mainly through the publication of literature, such as the bi-monthly journal, **African OS&H** (formerly **National Safety**) which has been published without interruption since 1932.

Other publications published by the Safety First Association include The Safety Handbook, Cartoon Booklets covering a variety of topics and Posters.

**SAHARA  
WORKWEAR**

*the quality is in our stitch*

Member of  
**SAPEMA**

As a result of the gap in the niche end of the workwear market, SHEQ SAFETY was born in 2004.

Sheq Safety has a national as well as an African supply footprint to various industries, specialising in PPE Vendor Managed On-Site store facilities for the mining and industrial sector.

Supply distribution points are based in: Mogale City, Gauteng, Hillcrest, KwaZulu Natal, Rivergate Cape Town and Western Cape.

Sheq Safety owns the SAHARA WORKWEAR Registered brand and is an SABS 434 accredited production facility.

Sheq Safety is represented on SAPEMA as well as a number of other SABS/SANS technical committees in the personal protective equipment industry.

We custom design our workwear to our customers' needs and our range is designed to offer a one-stop product supply base not limited to workwear but inclusive of gifting road safety, medical consumables and various other products.

Sheq Safety's business philosophy is to provide to the customer quality products at a fair price and this has been responsible for the steady growth and long-term supply relationships that we enjoy with our customers.

Sheq Safety's head office is centrally located in Mogale City Gauteng. The warehouse is 4000sqm where we keep designated back-up stock for all our VMI stores and contract customers.

**Services and products include:**

- Vendor managed VMI on site store
- Personal protective clothing & equipment
- Corporate & casual wear
- Chefs & hospitality clothing
- Security clothing

- Promotional gifts
- Signage
- Sublimated custom design sports & gym clothing/ gear
- Custom designed clothing to cater for your corporate needs
- Corporate branding displays
- Barricade fencing
- Medical consumables

**SCHAUBURG  
Systems**

Schauenburg (Pty) Ltd trading as Schauenburg Systems opened its doors for business in South Africa in 1972. An Original Equipment Manufacturer (OEM) for mine safety, Schauenburg offers the services of a system integrator with comprehensive turnkey solutions including a full bouquet of multi-disciplinary services and program management methodologies required to ensure a successful and cost-effective solution for the full spectrum of mine safety solutions and management. Schauenburg has a countrywide footprint and with its expertise in integrated systems, started its first IoT system in 2010 with the MIMACS integrated solution.

Having the right safety equipment is crucial while working in hazardous environments. Schauenburg's equipment will assist with creating a safe working environment, where operational efforts are maximized.

At Schauenburg Systems, we research and manufacture mine safety equipment that is designed for the harsh African mining environment. Schauenburg's protective gear helps prevent the risk of serious injury and creates visibility in which operational staff members are working, creating a workplace that is safe and productive.

Schauenburg also offers safety equipment apparatus that detects fire, hazardous and poisonous gases and heavy vehicle collision avoidance. Schauenburg Systems offers high-grade safety systems that comply with the mining industry's norms and standards. At Schauenburg Systems, we are committed to providing our clients with high-quality mine safety equipment that ensures maximum protection of your mine workers.

uvex safety is an innovative brand systems provider with international manufacturing expertise. uvex develops and manufactures industrial safety products from head to toe that comply the highest international standards in terms of quality, function and innovation.

uvex safety was founded in 1926, and has its head office in Fürth Germany, with subsidiaries in most major countries, including South Africa. It is owned and managed by the Winter family who founded the company.

uvex safety South Africa started operations in 1993, and has grown considerably, establishing itself as one of the leading PPE suppliers in the region.

The uvex whisper range of reusable hearing protection is manufactured to international quality standards in South Africa. This affords the product a major benefit in being competitively priced for the local market.

Other local initiatives include assembly and packaging of helmets, respiratory OEM, prescription safety eyewear and eye-wear cleaning stations.

The uvex safety South Africa head office is in Durban and a regional sales office is situated in Centurion. The local market is serviced by selected distributors in the various regions, with uvex South Africa supplying throughout Southern Africa.

Since 2011 the uvex Dubai branch supports into the regions of Middle East, Northern Africa and India.

uvex, through the uvex academy, offers a unique service to industry by providing full technical support, product training, awareness programmes and carrying out site surveys at distributors and end users.

The uvex academy provides conservation training for eye, hearing, hand, head, disposable coveralls and respiratory protection in several languages.

uvex safety South Africa is very involved at all levels in SAPEMA, an organisation formed to represent the suppliers of PPE in South Africa and ensure that safety products used in South Africa conform to the established standards.

All safety products manufactured and distributed by uvex safety carry the relevant EN standards and conform to the requirements of the applicable SABS standards.

uvex is not just a product brand, the mission statement "protecting people" indicates the total commitment to industrial safety through the application of the right products, training programmes, site surveys and safety assessments, all as a part of the total supply offering.

uvex safety is proud of its heritage and ownership of one of the world's leading safety brands, and continually strives to uphold the very strict quality and service policy maintained by uvex internationally.
